New Application Notice: Strip Coated Adhesive or Cohesive Film

Aurora, IL – Surface Guard announces our new product capability. Strip coating (aka Spot Coating) Adhesive or Cohesive Films.

Features:

- Adhesive/cohesive coating applied to the film in strips in the machine direction on the roll. Product can be converted to provide rolls with two strips of adhesive/cohesive applied on each edge of the roll. Product can also be converted to provide rolls with one strip of adhesive/cohesive on one edge of the roll.
- Multiple adhesion/cohesion levels are available.

Benefits:

- Interior automotive applications. Strip coated film can adhere to fabric surfaces only, while still wrapping around vinyl or other high gloss areas. This provides greater flexibility in protecting multiple surfaces.
- Cohesive coated products can be wrapped around surfaces, only sticking to itself at the strip-coated area.
- One strip coating on roll – product can be applied with adhesive strip on top and used as drape type protector for the surface underneath.

Surface Guard, Inc. is a custom coater and converter of surface protection films and cohesive packaging products. SGI manufactures only the highest quality protective products to protect a wide range of surfaces and applications.
