## Automatic Cold Seal Packaging Equipment and Material

**Aurora, IL** – Surface Guard Inc. and our sister company Single Face Supply Co. manufacture cohesive coated films, paper and single face corrugated (aka “Cold Seal”). SGI cold seal products can be printed in **two colors** and are available in custom, cut to width size rolls. (Sheeting capabilities available with cold seal corrugated).

Typical applications include the use of either fully automatic or semi-automatic cold seal packaging equipment. We’re proud to announce that SGI has recently taken delivery of a fully automatic System Packaging 9000 Cold Seal Packaging machine.

### Why did we buy this machine and what does it mean for our Distributors?

1. SGI plans on using it to demonstrate the types of packaging alternatives that can be used with SGI cold seal products.
  - a. Do you have a customer considering cold seal? If so, send us the parts they are considering packaging and we will return that part packaged utilizing the optimum combination of cold seal materials from SGI. What better way to show your end user what their package will look like.
  - b. In addition to sending the part or item back to you or your end-user, we can digitally record the item being packaged on the machine and either email you or send you a disk showing the item being packaged.
  - c. Our doors are also open for you and your customer to visit and observe the SP-9000 machine in action. Call your SGI sales rep. and schedule a visit.
2. You might even start to see some of our samples showing up in Cold Seal vs. Boxes!!

### Some Typical Cold Seal Application Examples:

- **Catalog & Order Fulfillment Applications:** Ordering through the internet has really pumped life into cold seal packaging applications. Cold seal is an ideal product for fulfillment operations who package everything from CD’s/DVD’s to clothing.
  - Typical Packages: Cohesive paper-to-paper, cohesive film to film, cohesive corrugated to film.

- **Book Publishers & Distributors:** Replace boxes with cold seal corrugated and reduce your packaging costs and labor costs.
  - Typical Package: Cohesive corrugated to corrugated.
- **Automotive & Building/Construction Hardware or Parts:** Companies shipping spare parts, or loose parts/accessories with a finished product can package those parts with cold seal. This is a cost-effective replacement for bubble mailers, boxes or poly bags.
  - Typical Package: Cohesive film-to-film, cohesive paper to paper.
- **Corrosion Resistance Protection:** Protect metal parts from corrosion caused by rust.
  - Typical Package: SGI VCI Cohesive Film

Surface Guard does not distribute System Packaging machines. However our cold seal products are a natural fit for their equipment so we maintain a close working relationship with them. For further information on System Packaging, call Don Antonovich at 419.666.9712

For brochures or literature on cold seal products or equipment contact your SGI/SFS sales representative.
